

ABSTRACT

A wine rack for mounting on a wall or other surface, the wine rack including at least a first and second pair of support members. In one embodiment, the first pair of support members
5 may support at least a first and a second wine bottle in a substantially parallel relation to the wall, wherein the second bottle is positionable proximate the wall, and wherein the label of the first wine bottle is visible to a person standing in front of the wine rack. The second pair of support members may
10 support at least a third and a fourth wine bottle in a substantially parallel relation to the wall, wherein the fourth bottle is positionable proximate the wall, and wherein the label of the third wine bottle is visible to the person standing in front of the wine rack. In one example, a pair of frame
15 elements may be attached to the support members in order to mount the support members to the wall.
